

SurgiMove®

The SurgiMove is perfectly suited for a wide range of surgical applications, its advanced design offers multiple positions including 360 degree adjustable armrests.

Ease of use

The SurgiMove's easy-to-use foot pedals and fully adjustable back and armrests achieve superior comfort and control.

Additional advantages include:

- Central braking system effective on two castors
- Excellent manoeuvring due to the double rimmed castors
- Spacious legroom thanks to the chassis design
- Comfortable height adjustment via foot control

Customizable seat configurations

The SurgiMove's customizable seat configurations with fully adjustable backrest and armrests provide optimal support to meet the surgeon's specific positioning preferences.

Seat styles: Ergo seat / Curve seat / Saddle seat / Callista seat with permanent contact Lumbar support

Armrests: Multiposition armrest / Rotating armrest / Standard armrest

Upholstery

The standard upholstery material is Stamskin. This smooth, durable and color tight artificial leather is resistant to water, blood, perspiration moist and mold or mildew stains. Approved conform international fire safety regulations and suitable for environments that require strict hygiene. Available in a wide range of colours. Other materials are available on request.

Operating instructions:

- 1 Foot controlled height adjustment
- 2 Brake pedal
- 3 Backrest adjustment
- 4 Armrest height and width adjustment

Central brake procedure:

- A) Press the brake pedal on the front to lock the chair safely.
- B) To unlock the chair press the brake pedal on the back.

Application

The SurgiMove is ideal for a wide variety of professions where hygiene is of the utmost importance.
